

## **ZEOLITES 2018 – TECHNICAL EXCURSION**

### **SLOVAKIA, Company Zeocem, a.s. Bystré and Quarry in Nižný Hrabovec**

30th of June 2018 (Saturday)

Zeolite 2018 field trip is planned in Nižný Hrabovec deposit of zeolite. Zeolite was first utilised for its exceptional properties at the beginning of the 1950s with the first in-depth research into the properties of this extraordinary natural rock. Zeocem, a.s. holds the extraction rights to a reserve of clinoptilolite, which belongs to the large zeolite group. The quarry is located in Nižný Hrabovec in eastern Slovakia. This zeolite reserve is characterised by its richness and its purity, which rank it among the world's best sources.

Preliminary plan of ZEOCEM Quarry visit:

7:00 a.m. – Kraków departure – meetingplace : in front of the conference venue.

1.00 / 1:30 p.m. - Arrival to ZEOCEM Quarry
